

Package Skill Level system

E

These are other skill levels than the classic ones. In the past you had 10 levels, each with a list of tricks you had to master to achieve the level. In this system you are not forced to do the levels in a defined order. You can try the levels that fit your interest and capability of unicycling.

We have so called **packages**, each with a list of tricks. If all tricks of one package are mastered with maximum one mistake, the package is mastered. The **count** of all mastered packages is the **skill level** of the rider. The packages are categorized in so called **directions**. Each direction consists of **3 packages: Basic, Advanced, Pro**. In one direction the Advanced package can only be tried if the Basic package is already mastered. The Pro package can only be tried if the Advanced package is already mastered. The first package to master (the first level) is the Basic package of the direction „Riding“.
